## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McGarian (GB 2,377,234).

McGarian discloses a multi-cycle downhole apparatus comprising circulation sub 2; cylindrical body 4 with a longitudinal bore 12; apertures 40; piston 42; pin 86; control groove 52 defined in piston 42; control member 26. Piston 42 is slidable to align piston apertures 36 with body apertures 40 to allow or restrict communication from bore 12 to outside of sub 2. Control groove 52 defines a closed loop and determines whether or not longitudinal piston movement will alternate sub 2 between open or closed positions (Fig. 1a).

### ***Allowable Subject Matter***

Claims 1-10 and 14 are allowed.

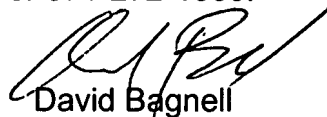

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose a piston with a circumferential control groove that is restricted against rotational movement.
